PIII Clinical Study Data on Chronic Constipation Treatment “GOOFICE® 5mg Tablet” Will Be Presented at DDW2018

Eisai Co., Ltd. (CEO: Haruo Naito; Headquarters: Tokyo, Japan) (hereinafter "Eisai"), Eisai's subsidiary for gastrointestinal diseases EA Pharma Co., Ltd. (President & CEO: Yuji Matsue; Headquarters: Tokyo, Japan) (hereinafter "EA Pharma") and Mochida Pharmaceutical Co., Ltd. (President: Naoyuki Mochida; Headquarters: Tokyo, Japan) (hereinafter "Mochida") announce that an oral presentation on PIII clinical study data on “GOOFICE® 5mg Tablet” (nonproprietary name: elobixibat hydrate; development code: AJG533, hereinafter “elobixibat”), a bile acid transporter inhibitor launched in Japan on April 19, 2018, will be given at Digestive Disease Week (DDW) 2018, June 2nd – 5th in Washington D.C., USA.

Elobixibat is a once-daily, orally available constipation treatment¹⁾ with a novel action mechanism. EA Pharma in-licensed this product from Albireo AB (Sweden). Elobixibat inhibits the bile acid transporter that regulates reabsorption of bile acids thereby increasing the flow of bile acids to the colon. The dual action of moisture secretion and bowel movement promotion by bile acids can facilitate defecation. Elobixibat is the world's first pharmaceutical product approved for marketing with the above action mechanism. At DDW2018, safety results obtained from a PIII clinical study and a long-term dosing study will be presented.
